Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 June 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

1. Claims 16-20 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/20/05.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 5, 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Haruch.

Haruch discloses a spray nozzle system comprising: a spray tip 20 with an elongated slot-shaped discharge opening (see figure 1), a cap body 22, a flow regulating insert 40 (see figure 2), the insert 40 also has a metering orifice 45 and an interchangeable portion 47 and 47' for modifying the flow performance (see figures 5 and 6).

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3752

5. Claims 4, 6, 10-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haruch in view of Lincoln.

Haruch teaches all the limitations of the claims except for the spray pattern of the nozzles overlap but do not interfere with each other. However, Lincoln discloses a spray nozzle system having the nozzle made from moldable material (see column 3, line 45), sealing o-ring 68/36, bayonet twist-on retaining structure 50/66, a unitary structure for cap 34 and tip 42, a slot-shaped opening 46, and the arrangement of the nozzle such that the spray pattern of the nozzles overlap but do not interfere with each other as shown in figures 1-3. Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Haruch with the arrangement of the nozzles such that the spray pattern overlap but do not interfere with each other as suggested by Lincoln. Doing so would provide an effective spray nozzle system (see column 2, lines 35-41).

With respect to claim 6, at the time the invention was made, it would have been would have been an obvious matter of design choice to a person of ordinary skill in the art to have droplets with an average size  $\geq 600$  microns.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a spray nozzle system: Wahlin, and Bendig et al.
